

Changing the Screenshot-Resolution and Creating Screenshots without the UI

1. Go to "C:\Users\YOURUSERNAME\AppData\Roaming\Promotion Software GmbH\EMERGENCY 5" and open the "emergency_5_settings.json"
2. Scroll down to "em5::GameSettingsGroup" and search for "ScreenshotCapturingSize"
3. Change the Capturing Size to your liking (This can even be bigger than your Monitor Resolution but has to be in the same Aspect Ratio!)
4. Save the .json File and start your Game
5. Take Screenshots with Print (Screenshots with the UI) or Right Ctrl+Print (Screenshots without the UI)(The higher the Resolution is the longer the Game will freeze to capture the Screenshot!)

Screenshots are Saved under "C:\Users\YOURUSERNAME\AppData\Roaming\Promotion Software GmbH\EMERGENCY 5\screenshot"

Most common 16x9 Resolutions:

- FullHD: "1920 1080" - Low Filesize
- 2K: "2560 1440" - Low Filesize
- 4k: "3840 2160" - Mid Filesize
- Retina 5k: "5120 2880" - High Filesize
- 8k: "7680 4320" - High Filesize
- 16k: "15360 8640" - Very High Filesize (Can Crash your Game!)
